

OIL & GAS REBATE PROGRAM

THE OIL & GAS CONSUMER JOURNEY

1. MEMBER CONSUMER SET UP

Co-op/PPD connects their consumer with Tri-State and an engineering firm. Co-op/PPD must set up this program with Tri-State prior to onboarding member consumers.

2. ASSESS

Tri-State provides consumer an efficiency and electrification assessment at no cost.

3. INCENTIVIZE

If savings or electrification opportunities are identified, Tri-State offers a custom incentive per kWh to encourage implementation.

4. EXECUTE

Consumer chooses efficiency measures to implement. The engineering firm helps manage technology transition.

5. VERIFY

Tri-State follows up with consumer to conduct measurement and verification of energy and demand savings.

ENERGY EFFICIENCY UPGRADES FOR ALL SEGMENTS OF THE OIL AND GAS INDUSTRY

**\$175,000+ IN REBATES AWARDED
SINCE 2023**

Tri-State's Oil and Gas Program is bringing new savings to the industry. Together with Cascade Energy, we work with midstream, upstream, and downstream oil and gas member consumers.

Take advantage of energy efficiency measures and electrification technologies such as heat trace systems and high efficiency pumps for demand savings. If you're doing these upgrades already, it makes sense to get credit for it. Those who enroll in the program get a report showing savings and rebates.

THIS PROGRAM BENEFITS YOUR CO-OP/PPD

- + Free service to Tri-State's members and their consumers
- + Strong rebate incentives to encourage action
- + Meet regulatory standards for emissions
- + Load growth and electrification potential
- + Demand response opportunity
- + Limited additional administration: the Co-op or PPD may participate in the program as much or as little as they desire

GET STARTED TODAY

To learn more or participate in the program, please contact Laura Getts at lgetts@tristategt.org or call 720-357-1866. Visit tristate.coop/programs for additional Tri-State programs.
