

Standards of Conduct

The information below is posted to meet the requirements set forth in FERC 18 CFR 358. This document is reviewed annually by Tri-State staff, posted to our publicly accessible company website and linked to our OASIS page.

Discounts:

Tri-State Generation and Transmission, Inc (TSGT) currently does not offer a discount on any of its transmission system or posted paths.

However, TSGT has two existing Yearly Firm Transmission Service contracts which have 50% rate discount with two of its customers. These contracts are:

A – TSOA-19-0006 (Lightning Dock Geothermal) on PLAY69 (POR) to HIDALGO115 (POD) with termination date of 12/31/2033.

B – TSOA-21-0066 (Tri-State Power Marketing) on PYGS (POR) to HIDALGO115 (POD) with termination date of 12/31/2027.

To provide comparable service like these two existing contracts, TSGT will consider discount request on its transmission system with the same POD of HIDALGO115.
